OrthoFoam SRE
Optimal Recovery

Indicated following foot and ankle surgical cases for application in theatre or recovery or even preoperatively for trauma cases to ensure reduction of swelling. The ergonomic design ensures patient comfort, with stable elevation at heart level and without strain on the knee or hip. A home use version of the SRE allows patients' seamless recovery after leaving hospital to the comfort of their home.

Product Code: OL.OF.SRE

OrthoFoam Foot Holder
Stable Positioning

Indicated for use in surgery for foot and ankle procedures, from trauma to total ankle replacements. This sturdy device removes the need to use upside down kidney dishes or improvised elevators, ensuring the heel is free and because of the carefully shaped cut out a reduction of pressure on the Achilles or calf during surgery.

Product Code: OL.OF.FH

OrthoFoam Adult Ramp Elevator

Indicated for all surgical cases where elevation is necessary without offloading the heel. Frequently used in trauma cases to enable easy x-ray control. The ergonomic design, with slight concavity, ensures stable support of the limb without too much pressure on the calf.

Product Code: OL.OF.ARE

OrthoFoam Knee Wedges
Nailing, Nailed.

Simplify patient positioning for tibial or retrograde femoral nailing procedures with our range of trauma triangles. The knee remains in the correct position throughout the procedure with our durable foam providing the perfect balance of cushioning and stability.

Product Code:

OL.OF.KWS	Ortholove Knee Wedge Small
OL.OF.KWM	Ortholove Knee Wedge Medium
OL.OF.KWL	Ortholove Knee Wedge Large

OrthoFoam Paediatric Ramp
Smaller, but Sturdy

Much like the larger Ramp Elevator, this smaller size allows quick and reproducible positioning, with a focus on paediatric and young adult patients, for a variety of lower-limb elective and trauma procedures. Raises the operative leg away from the table and above the contralateral side, allowing excellent visualisation of anatomy on image-intensifier fluoroscopy.

Product Code: OL.OF.PRE

OrthoFoam Prone Positioning Ramp
Posterior Approach

For cases where the patient is required to be in a prone position, this ramp is angled to support the lower leg, foot and ankle, with a gentle ramp slope providing elevation of the operative limb.
